CYBERSECURITY

SCANNING: NMAP

NMAP

Nmap is one of the most widely used scanning tools.

It's included in KALI.

To get familiar with some of the options, try to find **and use** the following:

What option is used to perform the following types of scans:

1. Full/Open
2. Stealth/Half-Open
3. Xmas tree
4. FIN
5. Null
6. Idle

What do the following switches do?

1. -sn
2. -PO
3. -PS
4. -PU
5. -sO
6. -sV
7. -O

NB: You use the / in the man-page to search.
